

PROFESSOR PANDA'S PIZZA GRAPH

Professor Panda is hosting a pizza party for all of his friends. To make sure everyone is satisfied with their pizza, he has taken a survey of fifty students to see which toppings are most popular. He found that of the people surveyed...

1. 10 is the number of people who like pineapple.
2. _____ more people like fresh tomatoes than chicken.
3. _____ fewer people like mushrooms than fresh tomatoes.
4. _____ is the number of people who like olives.
5. _____ is the number of people who like garlic.
6. _____ is the number of people who like jalapeños.
7. _____ more people like olives than anchovies.
8. _____ more people like pineapple than olives.
9. _____ fewer people like mushrooms than pepperoni.
10. _____ is the number of people who like chicken.
11. _____ is the number of people who like anchovies.

Use a ruler to help you identify the numbers represented on the graph!

Now, use the Secret Coded Letter Values chart to decode each of your answers. Write the letters that go with your answers in order on the lines below. The first one has been done for you.

Where's the best place to have pizza?

I _____ !
